

Stop the leak home survey

Dear Parent/Guardian,

Your children are looking at ways they can save water and may need your help. They have been asked to complete the following survey to find out whether there are any leaking taps at home. Use the coloured key to the right to identify the type of leak for each tap.

Instructions: Each drop is equal to one tap in that area. Colour in the drops to show whether the tap is not dripping, dripping, trickling or leaking as a stream. Total the number of taps for each area. At school we will look at results and discuss ways we can save water.

Thank you.

Area of the house		Tap 1	Tap 2	Tap 3	Tap 4	Total number of taps
Bathroom						
Kitchen						
Laundry						
Outside taps						
Outside sprinklers
